Detailed Action

The following is responsive to the preliminary amendment received Jan. 9, 2004.

Claims 2-12 and 14-23 are cancelled. No new claims are added.

Claims 1 and 13 are presented for prosecution on the merits.

Priority

Applicant is respectfully reminded that for benefit claims under 35 U.S.C. 120, the status of nonprovisional parent application(s) (whether patented or abandoned) should also be included. If a parent application has become a patent, the expression "now Patent No. ____" should follow the filing date of the parent application. If a parent application has become abandoned, the expression "now abandoned" should follow the filing date of the parent application. Applicant is respectfully requested to update the status of parent applications 10/176,418 and 09/534,381.

Information Disclosure Statement(s)

Applicant's Information Disclosure Statement received Jan. 9, 2004 has been considered in part, i.e. US patents. The remaining references will be considered upon receipt of the parent application.

Claim Objection(s)

1. Claims 1 and 13 are objected to because of the following informalities: in claim 1, line 3, after "protein", the term —complex—should be added for consistency. In claim 13, line 9, after "column", the term —to—should be added. Finally, in claim 13, line 1,

Art Unit: 1614

"proteiin" should be cancelled and replaced with --protein--. Appropriate correction is required.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1 and 13 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1 and 13 of prior U.S. Patent No. 5,747,332. This is a double patenting rejection. The claims of the instant application and the claims of USPN '332 are identical in scope.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1614

3. Claims 1 and 13 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-2 of U.S. Patent No. 6,713,608. An obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but an examined application claim is not patentably distinct from the reference claim(s) because the examined claim is either anticipated by, or would have been obvious over, the reference claim(s). See *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985). Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1 and 13 are generic to all that is recited in claims 1-2 of USPN '608. That is, claims 1-2 of USPN '608 fall entirely within the scope of claims 1 and 13 of the instant application. In other words, claims 1 and 13 are anticipated by claims 1-2 of USPN '608. Specifically, claims 1 and 2 of USPN '608 recite substantially identical methods as those claimed in claims 1 and 13 of the instant application, wherein the specific heat shock protein complexes that are synthesized or purified are non-hsp70 heat shock protein complexes.

Conclusion

Claims 1 and 13 are rejected.
